ABSTRACT

This report consists of the responses of the institutions of the State University of New York to the library questionnaires of the Education Division of the U.S. Department of Health, Education and Welfare and the New York State Education Department, for Fall 1972 and Fall 1975. It covers library collection, library staff, staff salaries, library operating expenditures, and institutional enrollment for the same periods. (Author/DAG)

PREFACE

This report consists of the responses of the institutions of the State University of New York to the library questionnaires of the Education Division of the U.S. Department of Health, Education and Welfare and the New York State Education Department, for Fall 1972 and Fall 1975.

This report covers Library Collection, Library Staff, Staff Salaries and Library Operating Expenditures for Fall 1972 and Fall 1975.

In order that these data may be reviewed in relation to user demands for library services, the enrollment for Fall 1972 and Fall 1975 is provided. Similar data concerning Academic Library Statistics were published earlier for 1967 through 1970. These reports are available at all State University of New York libraries (see Publications List, p. 51).

We gratefully acknowledge the participation of the library and institutional research personnel at each institution and the work of the statistical, typing and professional staff of the Central Staff Office of Institutional Research.

Susan G. Dean
Assistant for
Institutional Research

INTRODUCTION

This report consists of data from library questionnaires of Fall 1972 and Fall 1975. Not only do these years bring us up to date from the previous publications, but they also provide the most comparable data of any two surveys in the past five years.

The reader is cautioned, however, in comparisons between these two sets of data. A system of uniform collection of library data is still in the process of development on both the state and federal levels. The following descriptions outline the differences in data collection definitions and categories between Fall 1972 and Fall 1975 for each type of table.

Library Collection

In both Fall 1972 and Fall 1975, data were collected concerning the number of volumes of bookstock held at the end of the year, and the number of volumes in separate government documents collections. The greatest changes in data regarding library collection concern general development of new areas in library collections.

Specifically, in Fall 1972, data were collected concerning the number of reels of microfilm and the number of physical units of other microtext held at the end of the year. Development in the uses of microfilm and various types of microforms led to a change in data collection. By Fall 1975, data were collected in terms of the number of book titles and periodical titles represented by microforms. Similarly, the data regarding audio/visual materials, while collected in both studies, was reported in more specific detail in Fall 1975 than in Fall 1972:

Fall 1972	Fall 1975
-	Movies
Slides	Slides and transparencies
Recordings	Audio recordings
Maps	Maps and charts
-	Filmstrips

Periodical and serial titles were collected in similar format in both years and in both years data were reported as of a point in time. In the Fall 1972 study, data were reported as of the end of 1971-72, while in the more recent study, data were reported as of Fall 1975.

Library Staff

Development of multi-media library materials has also led to a change in the focus on professional library staffing. The following table shows the

specific position titles under which personnel were reported in each survey. Some are directly comparable, while others are combined or newly identified position titles:

Fall 1972	Fall 1975
Chief Librarian or Director	Chief Librarian(s)
Associate and Assistant Librarians	Deputy, Associate and Assistant Librarians
Heads of Major Library Units Other Professional Librarians -- Professional Staff other than Librarians	All other Librarians Media Specialists Other Professional Staff
Non-professional staff	Technicians, clerical staff and other supporting staff on the library budget

Staff Salaries

Data collected on staff salaries in Fall 1972 differed from that collected in Fall 1975. The result is a basic difference in the presentation of central tendency of the salary data.

In Fall 1972, data were collected by salary intervals in two categories: (1) 9-10 month contract and (2) 11-12 month contract. Those working less than nine months and those employed part-time were excluded. This distribution permitted the calculation of median salaries.

In Fall 1975, all employee data were shown on an 11-12 month basis so that all employees who worked at least nine months of the year were reported, and their salaries were converted to equivalent 11-12 month salaries. The number of persons and aggregate salaries were reported by type of position. These data precluded the calculation of a median salary by type of position, therefore a mean salary was calculated.

Comparisons of Fall 1972 and Fall 1975 data must be made with the understanding that the median and mean salaries are not exactly comparable, even though both are measures of central tendency.

Salaries reported on these tables were for the year in progress (Fall 1972 and Fall 1975) and do not equal expenditures for salaries reported in the Library operating expenditures tables. Library operating expenditures are reported as of the end of the previous fiscal year (1971-72 and 1974-75).

Library Operating Expenditures

Data regarding library operating expenditures have been summarized and reported in thousands for the reader's convenience. Exact year-end data are usually not available at the time this survey is completed. Respondents are asked to complete this section with the institutional business officer and to estimate in areas where final totals are not yet available.

Data for Fall 1972 do not include amounts paid for fringe benefits. The Fall 1975 survey requested such data, and they are presented on the Fall 1975 tables as reported by each institution. For State-operated institutions, fringe benefits are actually paid from a separate New York State account. For this reason, fringe benefits were not included in six institutional responses.

Official Credit Course Enrollment

Tables reporting Official Credit Course Enrollment for Fall 1972 and Fall 1975 are directly comparable on an institution by institution basis. However, the totals for the State University and the Community Colleges are affected by the fact that the eight Community Colleges under the sponsorship of the New York City Board of Higher Education were no longer a part of the State University of New York as of July 1, 1975. These community colleges are included on the Fall 1972 table and excluded on the Fall 1975 table. Comparisons must be made with this in mind.

Despite these particular differences, comparisons can be made between the data from the two surveys. The number of volumes in library collections, number of professional and non-professional library staff, and amount of library expenditures provide a basis for comparison institution by institution within each time period and from Fall 1972 to Fall 1975.
